

dış ve iç mekan dekor ürünleri

Sağlam ve Estetik Tasarımlar

DECOSET 1992 yılından günümüze kadar dış cephe kaplamaları ve dekoratif çözüm uygulamaları yapan kuruluşları tarafından 2007 yılında kalite ve estetik ürünlerde sınırları zorlayan, genç ve dinamik kadrosuyla, dış cephe aksesuarları ve profilleri üreten firma olarak kurulmuştur.

DECOSET Kaliteli ve estetik ürünler üretmeyi, bunun paralelinde müşteri memnuniyetini sağlamayı kendine prensip edinmiştir. Uygulamadan gelen bilgi birikimlerini imalata aktararak, ürünlerde olması gereken teknik değerleri üretmeye adapte olmuş, böylece kısa süre içerisinde kalitesini ve hizmet anlayışını gerek yurtiçi ve gerekse yurtdışında ispatlamıştır.

Vizyonumuz

Dürüst, çözüm odaklı, kaliteli ürünler üretmek ve bunun sürecini sağlayarak, sektöründe kalite çizgisini daima önünde tutmak ve dünya ile eş zamanlı olarak teknolojiyi kullanmak.

Misyonumuz

Müşteri isteklerine ve beklentilerine gereken önemi vermek, kalite politikasına uyumularıyla yeni ürünler geliştirmek.

HİBRİT KAPLAMA HYBRID COATING

DECOSET was incorporated as a company to manufacture external frontal accessories and profiles with its young and dynamic staff in 2007 by its founders who were involved in external frontal sidings and decorative solutions applications starting from 1992 till today.

DECOSET adapted itself a principle to manufacture high quality and aesthetical products and to provide customer satisfaction in parallel. It has transferred all the background information it has acquired from implementation to manufacturing and adapted the technical values that the products shall have to manufacturing and thus proved its quality and philosophy of service in a very short time either at home or abroad.

Our vision.

Honest, solution focused, producing high quality products and to provide its permanency and to be a leader with quality in its field and to use modern technology simultaneously with the world.

Our Mission

Attaching required importance to customer demands and requirements and to develop new products as long as it conforms with the quality policy.

Gönye payları dikkate alınarak uygulama yapılacak olan yüzeyin denizlik ölçüsü alınır.

The dimensions of the application area shall be discreetly taken by means of a meter by taking the meter allowance into consideration.

Söve uçlarını, gönye vasıtasıyla 45°'lik açı olacak şekilde belirleriz.

Window frame tips shall be determined adjusted to form a 45° angle by means of the meter.

Gönye ile açısı belirlenen söve, testere aracılığıyla düzgünce kesilir.

Window frame, angle of which was specified by means of a meter shall be smoothly cut by a saw.

Sövenin yüzüne gelecek olan arka kısmına yapıştırma sürülür.

Adhesive shall be rubbed over the back of the window frame which will come to the surface.

Yapıştırma işlemi tamamen sona erdikten sonra kontrol ediliyor, geçici olarak çivilerle yüzeye sabitlenir.

Window frames which completed adhesive application shall be controlled with a balance and fixed to the surface by temporarily nailing.

Yüzeye uygulanacak olan denizlik veya taş profil 45°'lik açıyla uç kesimlenir kesilir.

The tips of the windowledge and crown profile shall be cut by an angle of 45°

Kesimi yapılan söve uçları ve ekleri "DECOSET Ek Yerli Yapıştırma Harcı" ile yapıştırılır.

Cutting edges and attachments are affixed with "DECOSET Attachment Adhesive Waste."

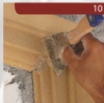

45°'lik açı ile kesimi yapıldıktan sonra denizlik yapıştırılan denizlik uçları estetik bir görünüme kavuşur.

Windowledge tips are elaborately adhered after being cut with an angle of 45° and gains an aesthetic appearance.

Uç kesimleri yapıldıktan sonra denizlik, yüzeye yapıştırılarak uygulama tamamlanır. Yapıştırma mukavemetini almak için geçici olarak çakılan çiviler sökülür, Deco Set özel söve dübeli ile mekanik sabitleme yapılır.

The windowledge with the tips cut are adhered to the surface and the implementation is completed. When the adhesive sticks firmly than the temporary nails are removed and mechanical fixing is fulfilled with Deco Set special window frame fixing plug.

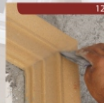

Söve profilleri ek birleşimleri ve söve dübelleri üzerine Deco Set özel tamir harcı ile tamirat yapılır.

Window frame profiles additional joints and window frame fixing plugs are repaired with Deco Set special repairment mortar.

Deco Set özel tamir harcı kullanımdan sonra oluşan pürüzler fırça yardımıyla düzeltilir.

The roughness which appears after the implementation of Deco Set special repairment mortar are redressed by means of a brush.

İnce zımpara ile de kurumuş olan tamir harcına alt pürüzler temizlenir.

The roughness of the dried repairment mortar shall be removed by a fine sandpaper.

Profil ürünlerde boy 2000 mm dir. İstenilen farklı şekillerde profil ve dekor ürünler için firmamızla iletişimi kurunuz. Firmamız profil detayları üzerinde değişiklik yapma hakkına saklı tutar.

The length of the profile products is 2000 mm. Please contact our Company for your different shape profile and decorative products. Our Company keeps its right to adjust any amendments on the profile details as reserved.
